Unique to **TestoFX Xtreme** is our free testosterone blend, which lowers sex hormone binding globulin (SHBG), ensuring that free testosterone levels remain high. Free testosterone is the active form that the body can utilize for muscle growth, energy, and overall vitality. Additionally, the testosterone-boosting blend naturally increases total testosterone levels, while the estrogen-reduction blend reduces harmful estrone estrogen while maintaining beneficial estradiol estrogen. The health and bioavailability blend further promotes organ health and maximizes nutrient absorption.*
